

Kenta Young

Senior Software Engineer | Shopify & Ecommerce Engineering

303-249-0977 | Kenta@KentaYoung.dev | KentaYoung.dev | Homedale, ID | Remote

PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience delivering custom web applications, client-facing platforms, and ecommerce storefronts. Recent work focuses on Shopify Online Store 2.0 architecture, Liquid, JavaScript/TypeScript, Vue, React, Tailwind CSS, Recharge subscriptions, analytics integrations, and customer account/checkout workflows. Leads a small development team and partners directly with clients to turn ambiguous requirements into maintainable, conversion-focused implementations.

TECHNICAL SKILLS

- **Shopify:** Shopify Online Store 2.0, Liquid, Shopify Plus, metafields, metaobjects, Shopify Flow, Shopify Forms, Search & Discovery, product templates, collection templates, PDPs, cart, checkout, customer accounts
- **Ecommerce:** Recharge subscriptions, variant-level selling plans, catalog migrations, subscription migrations, Intelligems, Klaviyo, Gorgias, Rivo Rewards, product merchandising, conversion-focused storefronts
- **Analytics & Integrations:** Segment, GA4, Littledata, HubSpot order/customer sync, event tracking, metadata mapping, GA4 DebugView, ecommerce data validation, Intelligems A/B testing
- **Frontend:** JavaScript, TypeScript, Vue, React, AngularJS, HTML, CSS/SCSS, Tailwind CSS, Vite, npm, component-driven development
- **Engineering:** Technical leadership, architecture decisions, client discovery, code review, Git, GitHub, GitHub Actions, CI/CD, production debugging, performance-minded implementation

SELECTED ECOMMERCE ENGINEERING PROJECTS

- Led delivery across multiple Shopify client storefronts, including Shopify Online Store 2.0 theme development, PDP and collection flows, side-cart behavior, subscription purchasing, checkout workflows, and customer account experiences.
- Supported a major subscription catalog consolidation by moving separate subscription products into variant-based Shopify products with Recharge selling plans, updating PDP, quick-add, cart, upsell, and interstitial logic.
- Built and debugged ecommerce data integrations across Segment, GA4/Littledata, and HubSpot, including customer/order metadata mapping, event validation, and GA4 DebugView troubleshooting.
- Improved storefront maintainability through modern Shopify theme architecture, Vite-based tooling, GitHub workflows, and CI/CD systems for safer development and deployment.

WORK EXPERIENCE

Software Engineer / Senior Software Engineer | The Beyond Group | Remote

2022 - 2026

- Built and maintained custom Shopify and ecommerce storefronts for client brands, progressing into a Senior Software Engineer role with ownership over architecture, implementation strategy, client-facing technical decisions, and mentoring peers.
- Led a small development team by coordinating technical execution, reviewing implementation approaches, planning work across client priorities, and raising the quality bar for maintainable storefront code.
- Developed Shopify Online Store 2.0 themes and custom commerce features using Liquid, JavaScript, TypeScript, Vue, Tailwind CSS, metafields, metaobjects, and modern theme tooling.
- Implemented subscription commerce workflows with Recharge, including variant-level selling plans, delivery schedule options, cart messaging, product card logic, and fallback behavior for migrated products.
- Integrated and troubleshooted ecommerce tooling including Intelligems, Klaviyo, Gorgias, Rivo Rewards, Shopify Forms, Shopify Flow, Segment, GA4/Littledata, and HubSpot.
- Partnered directly with clients to translate business requirements into technical plans, clarify edge cases, debug production issues, and deliver responsive storefront experiences. Owned projects from shaping to delivery.

Freelance Web Developer | Self Employed | Remote

2020 - Present

- Built and deployed a membership web app with a member portal that allows users to create posts and pay dues through PayPal.
- Created the membership app from the ground up using ReactJS and Firebase, keeping overhead low while maintaining secure user data.
- Designed and implemented WordPress sites based on client requirements, iterating with stakeholders until the final scope and expectations were met.

Software Engineer | ChamberDS | Long Beach, California / Remote

2020 - 2022

- Built and maintained functional prototypes and web apps for clients, turning product vision into working technical experiences.
- Implemented practical solutions around technical limitations in prototyping platforms and web application workflows.
- Provided dependency and risk analysis for customers, identifying potential issues and recommending mitigation steps before implementation.

Software Engineer | Level 3 Communications / CenturyLink | Broomfield, Colorado

2014 - 2020

- Developed, maintained, and supported Media Portal, the customer-facing CDN portal used by enterprise customers.
- Delivered roadmap items while collaborating with scrum masters, peer developers, and product owners to keep projects on track and ship stable, high-quality code.
- Overhauled portal Sass/SCSS structure for seamless rebranding and built an AngularJS/UI-Grid ad hoc tree dropdown supporting 10k+ entities with children.

EDUCATION

Regis University | Denver, Colorado

Bachelor of Science: Computer Science, Minor in Visual Arts | 2010 - 2014
